Observations								
Had difficulties navigating through the menus efficiently								Simplifying the flow structure into more fluid and simple interaction
Found booking for 10min option useful								-
Had trouble navigating to the bike location via the map								Zooming to the selected bike with a directional path to follow
Wandered what the differences between 'passes' and 'memberships' are								Creating a clear distinction between in the 'memberships' panel
Thinks the user path flow is smoothly communicated								-
Found the summary information of the bike confusing and unclear								Reducing the written information to the only important bits (price per min, unlock price and weight)
Had trouble finding relevant price information displayed during a ride								Adding centered section displaying the updating price for the ride
Shared General comments								
Would be good to have more information on the type vehicles and their specifications								Adding additional section inside the home page with relevant information of the vehicle types
In case of faulty equipment or any other problem would be nice to have a quick way to report it to the provider								Adding a report option as one of the main feature inside the home page
